📍 Krakow, Poland

Objective

Motivated and detail-oriented Mechanical Engineering student at AGH University of Science and Technology, equipped with a comprehensive understanding of mechanical design, manufacturing processes, and thermodynamics. Proficient in CAD modeling (Inventor, AutoCAD, SolidWorks), and prototyping, with a solid grasp of materials science, fluid mechanics, and Geometric Dimensioning. Experienced in collaborating with cross-functional teams to develop innovative and cost-effective engineering solutions. Passionate about problem-solving, continuous improvement, and integrating advanced technologies to enhance mechanical system efficiency and reliability. Seeking an opportunity to apply and further develop my skills in a dynamic engineering environment.

Education

● AGH University of Science and Technology

[Joined OCT 2023]

- Bachelor of Mechanical Engineering, Faculty of Mechanical Engineering and Robotics
[Expected Graduation Year: 2027]

Technical Skills

- **Manufacturing Processes:**
 - CNC Machining, Welding, Casting, Forging and Assembly.
- **CAD Modeling & Simulation:**
 - Proficient in Inventor, SolidWorks, AutoCAD (2D/3D), Simufact Forming.
- **Geometric Dimensioning & Tolerancing (GD&T):**
 - Designed and optimized precise part and assembly drawings to ensure manufacturing accuracy.
- **BOM & Documentation:**
 - Technical reports, version control, and engineering documentation.
- **Problem-Solving & Collaboration:**
 - Experience working on engineering projects, collaborating with teams, and optimizing designs.
- **Project Management & Communication:**
 - Coordinating design iterations, timelines, and technical documentation.
- **Working Under Pressure:** Ability to manage multiple tasks efficiently, meet tight deadlines, and perform in high-stress environments.
- **Teamwork & Collaboration:**
 - Strong interpersonal skills, thriving in team-based projects and cross-functional environments.
- **Adaptability & Problem-Solving:**
 - Quick learner with a proactive approach to troubleshooting and continuous improvement.
- **Attention to Detail & Perfectionism:**
 - Committed to precision, high-quality engineering solutions, and process optimization.

Relevant Coursework

- **Manufacturing Processes– Machining**
 - CNC operations, cutting tools, and precision manufacturing.
- **Thermodynamics**
 - Principles of energy transfer, heat engines, and thermodynamic cycles.
- **Manufacturing Processes– Forming**
 - Forging, casting, sheet metal forming, and plastic deformation techniques.
- **Strength of Materials Fundamentals**
 - Stress-strain analysis, material behavior under load, and failure criteria.
